OBJECTIVE

Web Developer and Computer Science student with strong full-stack foundations and a primary focus on backend development. Experienced in building production-ready MERN applications and eager to contribute to scalable, real-world web solutions.

EDUCATION

Bachelor of Computer Science, University of Haripur 2021 – 2025

SKILLS

Frontend	HTML, CSS, JavaScript, React, Tailwind CSS, Next JS
Backend & APIs	Node.js, Express.js, Next JS, REST APIs, JWT, WebSockets
Databases & ORM	MongoDB, PostgreSQL, Prisma, Mongoose
Tools	Git, GitHub, Swagger / OpenAPI

EXPERIENCE

Web Development Intern — Revnix Technologies Aug 2025 – Present

- Worked on multiple full-stack, production-ready applications with a strong focus on backend development.
- Designed and implemented scalable APIs, database schemas, and server-side logic using modern backend frameworks.
- Built end-to-end features, handling everything from database modeling to frontend integration.
- Collaborated with the team on code reviews, debugging, and improving application performance and reliability.

PROJECTS

ConnectP — Full-Stack MERN Social & Communication Platform

- Built real-time chat and video calling features using Stream Chat and Video SDK.
- Implemented secure authentication with JWT, bcrypt.js, and cookie-based session management.
- Developed responsive UI using React and Tailwind CSS.
- Created scalable REST APIs using Express.js and MongoDB.

Pace AI — AI-Powered Adaptive Learning Platform

- Integrated Gemini API to generate dynamic educational content and explanations.
- Implemented adaptive learning flows based on user behavior.
- Built auto-generated MCQs and assessments for progress tracking.
